## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being obvious over Baback Moghaddam et al. "PDH: A Human-Centric Interface for Image Libraries", Mitsubishi Electric Research Laboratories, Inc., 2002, pp. 1-6.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention "by another"; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of the reference under 37 CFR 1.131; or (3) an oath or declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the

Art Unit: 2628

application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). This rejection might also be overcome by showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a). See MPEP § 706.02(I)(1) and § 706.02(I)(2).

As per independent claim 1, Moghaddam a display area having a horizontal orientation (Fig. 1), the display surface positioned between the multiple users (Fig. 1), the display area having a circumference (Fig. 1);

a plurality of work areas partitioned from the display area, there being one working area for each user of the multiple users (i.e. a multi-person interface having multiple input and manipulation points for multiple simultaneous control) (pp. 3,col. 1, Para 2; pp. 3, col. 2, Para 1; pp. 4, col. 1, Para 2); and

means for orienting a displayed item in a particular working area using a global polar coordinate system (i.e. user interface orienting objects using polar coordinates) (pp. 3, col. 2, Para 1) that displays objects radially about a center of the display (Fig. 2; pp. 4, col. 1, Para 2).

Moghaddam fails to specifically disclose the display area having a centroid.

It would have been obvious to one of ordinary skill in the art at the time of invention to include the display area having a centroid with the method of Moghaddam because Moghaddam teaches radially displaying and manipulating objects about the center of the display area (pp. 4, col. 1, Para 2).

Art Unit: 2628

One of ordinary skill in the art would have been motivated to include the display area having a centroid with the method of Moghaddam for the benefit of manipulating objects for display relative to a circular display surface.

As per dependent claim 4, Moghaddam discloses the display area is circular (Fig. 1).

3. Claims 2, 3, 5-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
